III. **Digital and Social Media** | pages 8-18
IV. **Events and Actions** | pages 19-32
V. **Government, UN and Champion Engagement** | pages 33-41
VI. **News, Announcements & Reports** | pages 41-44
VII. **APPENDIX: Media Coverage List** | pages 44-52
I. Overview

UHC Day 2021 marked the end of the second year of the COVID-19 pandemic and coincided with the emergence of the highly transmissible Omicron variant. While historic breakthroughs in public health were achieved this year – namely, the development of multiple life-saving vaccines – there are major disparities in the procurement and delivery of these vaccines globally. At the time of this report, many high-income nations have vaccinated over half of their populations and are rolling out booster shots, while countless lower-income nations have yet to gain access to first and second doses for primary vaccination.

Ongoing inequities have highlighted and widened gaps in global health infrastructures that were present long before the virus first emerged. The pandemic has disrupted routine, essential health services around the world, reversing years of progress made against infectious and non-communicable diseases. In 2015, countries committed to achieving UHC as part of the Sustainable Development Goals and Political Declaration on UHC. In September 2019, countries reaffirmed this commitment by signing the landmark Political Declaration on Universal Health Coverage (UHC) at the United Nations High-Level Meeting (UN HLM), committing to achieving UHC as part of the Sustainable Development Goals. Just a few months later, the first cases of COVID-19 were reported. Ultimately, the pandemic has revealed the urgency of fulfilling the commitments of the 2019 Political Declaration to achieve universal health coverage, gaining increased attention from world leaders, multilateral and private sector organizations and civil society.

Amidst this ongoing global health crisis – the worst in a century – and in light of the inequities that underscore the global pandemic response and recovery, UHC Day 2021 was an opportunity to stress the importance of Health for All that Leaves No One’s Health Behind.

With continued physical distancing and other public health restrictions in mind, the multi-stakeholder 12.12. Coordination Group of UHC Day (12.12 CG) —hosted by UHC2030 — encouraged and supported a substantial shift toward greater digital engagement, culminating in a 24-hour virtual rally on 12 December. Key campaign highlights and takeaways include:

- **Over 1.7 billion** potential Twitter impressions, **112 million** accounts reached, and **46,000** total UHC Day mentions (tagging @UHC_Day and/or using #UHCDay or #HealthForAll) on social media, between 11/29-12/17.
- **19,500 visits to the @UHC_Day Twitter page** between 11/12-12/17.
• **Almost 9,000 visitors** from 170+ countries to the [uhcday.org](http://uhcday.org) site.

• **150+** international articles and blogs focused on UHC, national policies and programs, COVID-19, *Walk the Talk: Health for All* Challenge, and the newly published global UHC monitoring reports.

• **16** governments announced new policies and/or programs to promote health for all in their countries. *Note: this number was captured by organic coverage on traditional and social media and may not capture the true extent of country engagement for UHC Day.*

• **75** UHC Day Champion videos and quotographics submitted and shared on social media, including national and local government leaders from **24 countries**.

• **4 UHC-focused reports:**
  - UHC 2030: [State of commitment to universal health coverage: Synthesis 2021](http://uhcday.org)
  - CSEM: [Civil Society Perspectives on Reaching Universal Health Coverage](http://uhcday.org)
  - WHO and World Bank: [Tracking Universal Health Coverage: 2021 Global monitoring report](http://uhcday.org) and [2021 Global monitoring report on financial protection in health 2021](http://uhcday.org)

• **1700+** participants in this year’s global *Walk the Talk: Health For All* Challenge.

• **13.7 million:** the number of total steps counted during the *Walk the Talk: Health For All* Challenge – far surpassing our goal of 5 million!

This report summarizes the 2021 campaign strategy and associated resources, as well as known global engagement and impact.

II. **2021 Campaign Theme and Narrative Highlights**

2021 crystalised the need for resilient, equitable health systems capable of meeting everyone’s needs. The global inequities in access to COVID-19 diagnostics, treatments, and vaccines this year has demonstrated that the world’s most vulnerable populations are continuously left behind, and will continue to be long after the pandemic ends if we don’t call for bold change now. To drive this point home, the 12.12 CG chose “**Leave no one’s health behind: Invest in health systems for all**” as this year’s theme.

Key goals under this year’s theme were to emphasize that **health is an investment, not a cost** and to hold governments accountable to rebuild **resilient, equitable health systems that prioritize the most vulnerable**. There is now an urgent opportunity for **more and better investments** in the foundations of health systems — and an integrated approach grounded in **primary health care** — to ensure that no one is left behind in crisis or calm.
This involves prioritizing **equity in COVID-19 response** strategies, increasing public health spending to **lower catastrophic out-of-pocket costs**, investing in the training and **protection of health workers**, **dismantling power imbalances** in the decision-making process, and stakeholders collaborating to **design health systems around communities’ needs**. Holding leaders accountable to make these investments and deliver on their promise of health for all is not only crucial for UHC but also key to achieve health security goals and wider socio-economic progress.

Building on last year’s call on leaders to invest in health systems that protect everyone, this year’s theme included five key calls to action that were interwoven through key messaging and resources like this year’s digital toolkit:

**Equity: Balance the Scales to Ensure Fair Access to Care**

The pandemic has exacerbated existing health inequities and forced vulnerable populations into even more precarious positions. It’s time to balance the scales to ensure temporary setbacks do not become permanent trends. Universal health coverage is about meeting everyone’s needs, no matter who or where they are.

**Resilience: Create Health Systems that Protect Everyone in Crisis & Calm**

The pandemic has exposed fault lines in the foundations of health systems. Now, we have a responsibility to learn from these lessons and intentionally rebuild equitable, resilient health systems and invest in a workforce that can withstand future threats.

**Accountability: Drive Stakeholders to Act for Accountability**

We can’t afford to let landmark global commitments to universal health coverage fall by the wayside. It’s time to hold leaders responsible for building and safeguarding systems that leave no one behind, starting with health. And in return, prioritizing UHC will unlock dividends for wellbeing and progress everywhere.

**Investment: Direct Funding Towards a Healthier, Safer Future**

Health is an investment, not a cost. The pandemic presents an opportunity for governments to invest in strong health systems, increase public health financing, and lower catastrophic out-of-pocket costs to ensure everyone, everywhere can access affordable, quality care in times of crisis and calm.

**Collaboration: Forge a Common Ground for Global Progress**

Collaboration across issue areas, sectors and countries is essential for pandemic response and mobilizing a broad base of support for universal health coverage. Through global partnerships that leverage the strengths of diverse stakeholders, we can achieve health for all.

As in past years, partners and advocates around the world also used UHC Day to remind networks of the linkages between UHC and a wide range of issues across health and development, such as **gender inclusivity**, **mental health**, **youth involvement**, **women & girls**, **sexual and reproductive health and**
rights, neglected tropical diseases, services for people with disabilities, and primary health care. Throughout the campaign, messages underscored that we must work together to make the most of limited global resources, including COVID-19 vaccines, and that UHC is a common engine through which countries can combine science and solutions to drive global progress. This whole-of-society approach to promoting health also lies at the heart of UHC.

### III. Digital and Social Media

**Visual Identity**

The visual identity for the 2021 campaign was an optimistic, energetic take on the official UHC Day branding, featuring bright tones from the color palette and dynamic gradients. This was a departure from the ‘dark mode’ motifs of recent years and aimed to evoke a sense of boldness, action and forward motion, while organic shapes represented flexibility and adaptability. At the same time, the identity built on themes seen in the 2020 campaign, like urgency and activism, by using humanizing imagery like people rallying, collaborating for progress, and taking action to balance scales for equity.

Rounding out the second year of the COVID-19 pandemic, graphics leaned into the power of virtual calls to action with digital speech bubbles and animated typography. Graphics also depicted pandemic-centric illustrations like masks and vaccines and used snappy messaging to remind audiences that we must continue to come together and push for equity to end this pandemic.
UHC Day Website

The UHC Day website continues to be the primary hub for content and resources around UHC Day. The site features both evergreen and timely information about the Day and aims to help users learn about progress towards UHC globally and in their countries, plan their UHC Day activities, and get excited to take action for Health For All.

The [Commitments page](#) overviews the political commitments arising from the 2019 High-level Meeting on UHC, and was also updated this year to include the latest [State of UHC Commitment Report](#), the [2021 UHC Global Monitoring Reports](#), and information about the [Coalition of Partnerships for UHC and Global Health](#). The [Global Campaign](#) and [Toolkit](#) pages provide detailed information about joining the campaign on 12.12 and a robust selection of materials to use for different types of activities on the day (see section below for more details on the toolkit). Additionally, a new [Resources page](#) created a dedicated space for showcasing partner-generated content and resources from years past. We expect that the
page will become an **important repository for UHC Day materials** that can be adapted and reused year after year.

The Toolkit and Global Campaign pages continued to be the **main source of content and the most popular pages on the site** this year. For the first time ever, the Global Campaign page also included an official UHC Day **Resource Mobilization Guide** to help inform advocacy and funding strategies for frontline campaigners.

The UHC Day website was updated in several stages this year to **generate excitement and share updates** on the campaign. Website updates were timed to outreach pushes to the 12.12.CG networks, coalition and UHC2030 newsflashes, most notably:

1. To reflect the 2021 theme and branding (mid-July),
2. With resources for the “Get Ready” campaign (late September),
3. With the full toolkit (late October), and
4. With final campaign and virtual rally guidance and heatmap (late November)

**Website Analytics**

In the final push of the campaign (29 November–16 December), UHCDay.org had **8,826 visitors** with **21,966 total pageviews**, with an average of **2m 25s spent on the site**. Users on the site peaked on UHC Day itself, with **1,403 visitors** and an average session duration of **2m 45s**. This time on site is above average and demonstrates that users were interested in and dove into the site’s content. While the overall number of users in 2021 is a slight decrease from 2020 (-4%), traffic to and engagement with the site is still robust.

*Site metrics from 11/29-12/17*
Visitors to UHCDay.org this year came from 170 countries, representing a slight increase from last year. Countries with the most visitors were:

1. India (26%)
2. US (17%)
3. UK (4%)
4. Nigeria (3%)
5. Canada (3%)
6. Bangladesh (3%)
7. Kenya (3%)
8. Pakistan (2%)
9. Netherlands (2%)
10. China (2%)

Campaign Toolkit

This year’s UHC Day campaign toolkit was full of powerful, eye-catching graphics and GIFs to help visualize our theme and central narrative. With 9 core graphics and one theme graphic, this year’s toolkit housed the largest quantity of materials yet for UHC Day. Graphics were optimized for Facebook, Twitter, WhatsApp and Instagram and, for the first time, all graphics were made available in all six UN languages – English, French, Spanish, Arabic, Chinese and Russian – to reach a wide range of audiences. Design files for all graphics were also shared on the toolkit to make the designs customizable and allow campaigners to translate them into more local languages as needed.
With corresponding social media content — **over 45 suggested messages in total** — on different topics under this year’s theme “Leave no one’s health behind: Invest in health systems for all,” there were plenty of options to post on social media. This year, in addition to “click-to-tweets” on the site, we included a WhatsApp forward to make it more convenient than ever for advocates to share the toolkit among their networks, colleagues, friends and family.

Beyond the core graphics and messages, the 2021 toolkit also offered **Twitter and Facebook profile frames, UHC Day zoom backgrounds**, and **Twitter header banners** to help advocates personalize their social media channels and virtual meetings to spread the Health For All message.
Due to popular demand, we also introduced a number of customizable templates so that individuals and organizations could develop their own materials using UHC Day branding, including posters, documents, PowerPoint presentations, face masks and social media graphics. These templates helped to support a more decentralized campaign, with the social media graphic templates being especially popular.

Additionally, we included a refreshed version of the annual flag graphic and custom country tweet series with the theme “Tell Your Country: Leave No One’s Health Behind,” allowing advocates to choose their country from a dropdown menu for a customized tweet and accompanying graphic to download and share.

Individuals from 15 different countries around the world – Bangladesh, Ghana, Greece, India, Iraq, Japan, Kenya, Lebanon, Mexico, Nepal, the Philippines, Sierra Leone, Ukraine, United Kingdom and United States – utilized the flag graphic or custom country tweet.

**Official International UHC Day Twitter Account**

Social media has always been a central part of the annual UHC Day campaign. To leverage this, in 2021 we transitioned the informal UHC Day Coalition Twitter (@UHC_Day) account to serve as the official International UHC Day handle going forward. This provided a central platform on social media to share toolkit materials widely and mobilize support ahead of the Day. The transition took place on November 12, exactly one month ahead of UHC Day, and kicked off with a series of drumbeat posts encouraging people to get ready for UHC Day using
the messages and graphics from the 2021 toolkit. The @UHC_Day profile page was also re-branded and updated to include photos of frontline campaigners from more recent years.

Since November 12, the handle has posted 166 tweets total, garnering over 250,000 impressions. Additionally, in this time period there were over 19,500 visits to the UHC Day profile and the handle gained 234 new followers, bringing the total number to 9,045.

Campaign Analytics

The social reach of the overall UHC Day campaign, which includes content posted from other accounts, was impressive. Twitter engagement reached new highs yet again this year, with engagement with @UHC_Day, #UHCDay and #HealthForAll surpassing performance from 2021. Over the broad campaign period from 29 November – 17 December, social engagement for the campaign reached an impressive 112 million accounts and garnered 1.7 billion potential impressions.

Key Highlights:

- There was an increase in the overall number of contributors posting campaign content, with an uptick on UHC Day itself and a notable increase during the virtual rally period.
- There was increased use of the #UHCDay hashtag, including by the WHO and other multilateral organizations, CSOs, and other organizations.
- There was a slightly lower reach in the weeks leading up to UHC Day compared to 2020, but a higher reach during the broad campaign period and day itself.
- While slightly fewer people saw UHC Day messages in the weeks ahead of UHC Day, the increase in impressions from 2020 to 2021 demonstrates that people saw UHC Day messages more frequently, and the increase in contributors demonstrates that more people overall were joining the conversation.
- The 38 UHC champion quote graphics were posted in two Twitter threads, and individually garnered significant engagement from individuals and their organizations.
- This year, day-of Twitter content also included 37 UHC Day champion videos tweeted individually, starting with the earliest time zone to enter Dec 12, which were retweeted by many of the UHC champions on their accounts, significantly expanding the reach.
- On UHC Day itself, top-performing tweets came from accounts including: @WHO, @UN, @DrTedros, @MexOnu, @antonioguterres, @HelenClarkNZ & more.

- **Twitter impressions** are defined as the number of times UHC Day content was displayed on someone’s social media feed.
- **Twitter reach** is defined as the total number of unique accounts who saw UHC Day content.
- **Twitter mentions** are defined as the number of Tweets that used UHC Day-related key terms, such as #UHCDay or “UHC Day 2021.”
Social Media Highlights

People, partners and organizations around the world engaged through social media on and around UHC Day using various elements of the toolkit and their own organic content. Select highlights include:

Tedros Adhanom Ghebreyesus
@Tedros

#HealthForAll means that health is not a luxury for those who can afford it, it’s a fundamental human right. @WHO calls on all countries to make the right to health not just an idea or an aspiration, but a legal guarantee. Happy #UHCDay!

Dr. Rupa Bhart @rupabhart

It’s #UHCDay — #UniversalHealthCoverage remains unrealized!
Too many people cannot access quality affordable #healthcare!
Too many girls & women don’t have their #health needs met!
And the #pandemic is the great test we are collectively failing

Antonio Guterres @antonioguterres

The pandemic has reached nearly every part of the world, but health coverage still has not.
Achieving universal health coverage by 2030 requires investments in health systems, with emphasis on primary healthcare, essential services & marginalized groups.

Save the Children UK @savethechildrenuk

Universal Health Coverage means everyone, everywhere has access to health services when needed.

Alongside our partner @GSK we are calling for greater investment in #HealthForAll.

UHC Day 2021 Campaign Report | 17
Health for all means protecting families from financial hardship, especially those already poor and vulnerable.

Invest in strong health systems that leave no one behind. #UHC2030

Following #UHCDay, learn more about our support to the Government of #Bangladesh’s response to the #COVID19 crisis. It contributes to structurally strengthening the #health and #SocialProtection system

On this #UHCDay, our own @NRtoMed reflects on what #HealthForAll means and why we must commit to vaccine equity to end this crisis and build a healthier, safer future.

Over the past year, the #COVID19 pandemic continues to disrupt health services, with the world’s poorest and most vulnerable suffering most.

It’s @UN Universal Health Coverage Day #UHCDay2021!

#PrimaryHealthCare is the foundation of health for all, linking community power, multisectoral policy & action, health promotion, clinical & public health at the hyperlocal level.

More in this video: youtu.be/jUKQOJv9Vwy

Fós Feminista is joining #UHC_Day to demand #HealthForAll around the world. Our feminist alliance is doing our part in ensuring universal health coverage by 2030 through sexual and reproductive health education and removing barriers to care.

LEAVE NO ONE’S HEALTH BEHIND: Invest in Health Systems for All!

Let’s learn from COVID-19 vaccines. No one is safe until we’re all safe.
IV. Events and Actions

Although the ongoing COVID-19 pandemic imposed limitations to UHC Day activities this year, many partners were still able to host in-person events where safe. Many more were able to engage in various other ways, be it through virtual webinars, report launches, social media advocacy campaigns, participation in Walk the Talk: Health For All or the 12.12 virtual rally. In an effort to shift toward long-term, sustainable funding options to support frontline campaigners given ongoing resource constraints, the microgrant program was discontinued in 2019. This year, the 12.12.CG endeavored to make the 2021 campaign as inclusive as possible with the introduction of a Resource Mobilization Guide, featuring funding guidance, online courses, templates for donation asks, campaign inspiration and more resources for campaigners. The 12.12.CG is continually innovating to ensure UHC Day campaigners can access the resources they need.

Global Heatmap

100+ activities across more than 30 countries were submitted to the UHC Day global heatmap, representing actions taken by civil society organizations, NGOs, think tanks and academic/professional associations and networks. Organizations engaged with UHC Day by hosting in-person and virtual events, organizing social media campaigns, and reporting/publishing new data or content, such as blog posts. Heatmap submissions included:

- **53 virtual events**, including panel discussions, fireside chats, seminars and lectures, largely addressing the importance of UHC in light of the COVID-19 pandemic, focusing on vaccine inequities, gaps in coverage for vulnerable and marginalized groups, and spotlighting the roles of youth and women.
- **7 in-person events**, such as community training, meetings and townhalls, where local COVID-19 guidelines permitted gatherings.
- **40 social media campaigns** across Twitter, Facebook, Instagram, YouTube and WhatsApp to raise awareness and advocate for UHC.
- **1 global Walk the Talk: Health For All challenge**, held as a flagship UHC Day event. Nearly one thousand people participated at the in-person walk at the Dubai 2020 Expo, and many more participants took part in a 24-hour global, virtual step challenge. In total, 1,708 participants walked nearly 13.7 million steps toward Health for All.

Given the context of the ongoing COVID-19 pandemic and the emergence of the Omicron variant, there were fewer formal events and activities submitted to this year’s global campaign heatmap compared to last year, as expected. However, significantly more virtual events and
social media campaigns were submitted to the heatmap this year than last year. This indicates a shift in the way UHC advocates around the world organized, innovating amidst the pandemic.

**Virtual Rally**

The inaugural virtual rally on 12.12.20 served as the culmination of 2020’s global UHC advocacy and activities, helping recreate the energy, diversity and unity of typical in-person rallies of past UHC Days, and also to ensure that all interested partners would have a way to “attend” the day even if their typical pathways to engage had been disrupted.

This year, the #UHCDay Virtual Rally built upon 2020’s success in maintaining an inclusive and accessible campaign, with a sharper focus on the need for equitable health systems that leave no one behind. Advocates around the world rallied in their time-zones on 12.12.21, mobilizing in a variety of digital and in-person ways through three distinct engagement pathways: Ask, Amplify, and Act.

1. **ASK**

   Make your voice heard – ask governments, world leaders and those in power to act on their commitments to achieve universal health coverage.

   In lieu of branded merchandise, advocates and campaigners were also encouraged to utilize the newly-published [resource mobilization guide](#) to help develop their activities, find resources to build campaigns, understand the language of mobilization and assess and communicate impact.
2. AMPLIFY

Tell the world why #HealthForAll matters – write a message or take a video explaining why UHC is important to you, and why it’s critical that health systems leave no one behind.

“...”

Gina Lagomarsino
President & CEO
Results for Development
3. ACT
Rally for what’s right – take action and hit the streets, or screens, on 12.12 in any way you can.
As part of the Act pillar of the Virtual Rally, the 2021 campaign also marked the return of the global Walk the Talk: Health for All challenge. Hosted by the World Health Organization, in partnership with Expo 2020 Dubai and the Ministry of Health and Prevention of the United Arab Emirates, this year’s **24-hour global walkathon** featured people of all ages and abilities walking, jogging, dancing, and moving in any way they could to call for better health for everyone, everywhere.

**Nearly a thousand individuals at Expo 2020, including hundreds of frontline health workers, kicked off the challenge** on 12.12 in Dubai. Global change-makers and leaders who joined the Walk the Talk: Health for All challenge at Expo 2020 also included Dr. Tedros, the UAE Minister of Health HE Abdul Rahman Bin Mohammed Al Owais, HRH Princess Dina Mired of Jordan, the leadership of WHO EMRO, GLIDE, inspiring youth voices and a number of other exceptional individuals catalyzing the conversation around UHC. A short highlights reel of the day can be found [here](#).

The afternoon UHC Day Specialist Event at Dubai Expo 2020 explored important topics related to health security during crises, country-level innovation and the need for greater intergenerational collaboration. The full recording of the session can be found [here](#). Additional
photos and videos from the events at Expo can be found in the Dubai Expo 2020 UHC Day photo bank here.

EVENT AND ACTIVITY HIGHLIGHTS

Tinada Youth Organization (Kenya) hosted a Tweetchat with the theme “Investing in health systems for all.” The group posted a series of questions on Twitter and invited people to respond with their answers. Questions asked included, “Do you think the collaborations made so far have ensured a common ground for Universal Health Coverage global progress?”; “How has the pandemic affected the delivery of Universal Health Coverage globally?”; “Are stakeholders and governments ensuring accountability in leaving no one behind?”; and “How best can we sustain momentum towards strengthening Universal Health Coverage systems and processes?”

Pakistan’s Ministry of National Health Services hosted an in-person event, Commemoration of Universal Health Coverage Day, in conjunction with WHO, featuring a panel of several health experts.
BHORE (Nepal) organized a social media campaign, urging the Nepali government to prioritize the most vulnerable amidst the COVID-19 pandemic.

Nigeria Health Watch held a Townhall Engagement Meeting in Nigeria’s Federal Capital Territory under the newly launched Community Health Watch project. The Townhall aimed to understand the utilisation of Nigeria’s Basic Healthcare Provision Fund (BHCPF) and increase community awareness available funds.
Physiotherapy and Rehabilitation Center (Pakistan) organized a free three-day camp to increase awareness and commitments to holistic approaches for rehabilitation, and to increase accessibility to health services. The camp also provided health assessment and treatment services, mainly for women and children.

The co-chairs of the Group of Friends of Universal Health Coverage and Global Health (Permanent Missions of Georgia, Japan, and Thailand to the UN) and the WHO Office at the United Nations commemorated UHC Day with a reflection on the accomplishments of the health agenda over the past year and a look toward upcoming process for the High-Level Meeting on UHC in 2023. The program included an Overview of the 2021 UHC Monitoring
Report, updated on the State of UHC Commitment (by UHC2030), a screening of the UHC Day Champions video, and announcement of the Health for All Film Festival winners.

InciSioN Burundi created a five-day social media campaign and hosted an in-person event with medical students and a health assurance organization, discussing health coverage within the Burundi medical student population.

Multiple Sclerosis Society of India organized a cross-disability webinar on health insurance and addressing gaps in coverage in India, as well as a fireside chat with a health advocate who brought the subject of health insurance to the Supreme Court of India.
The Scio Foundation, based in Manipal, India, developed a week-long virtual program from 6-12 December. Entitled “Conscientia,” it covered aspects of healthcare like menstrual health, mental health, healthcare accessibility for persons with disabilities and members of the LGBTQIA+ community, geriatric health, awareness about Type 1 Diabetes and physical fitness.

The Lagos State Health Management Agency (Nigeria) held an outdoor low-impact workout session in honor of UHC Day and to promote the Ilera Eko health insurance scheme in Ikeja, Lagos.

Global health leaders and advocates commemorated UHC Day at Expo 2020 Dubai with the Walk the Talk: Health for All event and a specialist event which brought together leaders from the WHO, World Bank, UHC2030, and UAE and Thai governments.
Health Care for All Oregon held a drive-by “honk and wave” on International Universal Health Coverage Day. Additionally, the group scheduled a statewide online screening of the documentary film “Not Going Quietly,” which centers on ALS patient and healthcare advocate Ady Barkan.

Swasti Health Catalyst (India) posted a video on Twitter featuring a migrant woman who lives in an urban slum answering what universal health coverage means to her, to frame the release of their report, “Who is accountable for health? - The case of Community-Based Monitoring and Planning (CBMP) by SATHI.”

Primary Health Care Performance Initiative (PHCPI) sourced photos from PHCPI partners around the world to underscore the importance of primary health care in building resilient health systems and achieving health equity pledge on Twitter alongside colleagues across the PHCPI partnership to support strong primary health care to achieve health for all.
The International Training Center (South-East Asia) organized an e-conference which documented strategies and progress made towards the extension of Social Health Protection in the Asia Pacific Region.

Women in Global Health (global) organized a social media campaign, calling for a gender perspective to be incorporated into UHC design in order to leave no one behind and protect everyone.

UHC2030 and the Global Fund to Fight AIDS, Tuberculosis and Malaria (global) co-hosted a panel discussion session "Leave no one’s health behind: Invest in health systems for all" at the UNITE Global Summit, on the critical role that parliamentarians can play in securing resources to build stronger health systems.
Pathfinder International (global) hosted a virtual webinar to celebrate UHC Day and host a panel discussion on the importance of universal health coverage and the role of multi-sectoral partnerships to achieving UHC in low- and middle-income countries.

Humwell Pakistan planned several UHC Day activities, including an office-wide walkathon, an interview with doctors to gain insight into how HumWell is driving UHC, and a photo collage spelling out #SehatSubKayLiay (translation: UniversalHealthforall).

At the 10th Global Conference on Health Promotion, from 13 – 15 December, the Department of Health Systems Governance and Financing (WHO) hosted a UHC-focused webinar, “Social participation: Going the extra mile to design better health & well-being policies.” It was followed by a panel discussion addressing the benefits of social participation and the presentation of a resource that can be used to create, strengthen, and institutionalize social participation mechanisms for universal health coverage.
Dakshayani and Amaravati Health and Education (DakshamA Health), and Patient Academy for Innovation and Research (PAIR Academy), both based in India, jointly hosted a virtual event on 14 December entitled, “Healthcare Workforce - The first pillar for Achieving Universal Health Coverage.” The groups also held a weeklong social media campaign with the theme "Patient Centred Universal Health Coverage."

Blood Patients Protection Council held a rally of blood disorder patients and their parents at the Govt. Medical College Hospital in Calicut, Kerala, India to commemorate UHC Day. General Convener of the council Kareem Kassery inaugurated the rally. The event was featured in the print editions of several local newspapers.

Self-Care Trailblazer Group organized a “12 days of UHC” social media campaign on Twitter advocating for investing in self-care to strengthen health systems for all.
V. Government, UN and Champion Engagement

As always, the engagement of global decision-makers was a central vein of the 2021 UHC Day campaign – both to demonstrate a broad swath of support for UHC and to spur leaders to maintain commitments made to achieving Health for All.

For UHC Day 2020, the UHC2030 Co-Chairs and UHC Movement Political Advisory Panel issued a call for world leaders to “Protect Everyone” in the midst of the COVID-19 pandemic and to uphold the political declaration 2019 High-Level Meeting on UHC. Now, two years into the pandemic, the 12.12.CG strove to amplify the voice of governments, multilateral institutions and civil society leadership responding to this call and the needs of their populations throughout the 2021 campaign.

Additionally, this year, a two-prong video and quote graphic champion campaign crafted in partnership with country leaders within the Group of Friends of UHC and other decision-makers also flooded social media amplifying the importance of leaving no one’s health behind. Of the 75 champions who participated in the campaign, 24 represented national and local governments around the world (See additional details on the champion campaign below).

Infographic created by the Egyptian government for UHC Day.

| **Nigeria** | In a joint event with Chatham House, the governments of **Nigerian states** held a **UHC Summit** in Abuja.  
  - Governor Mr. Adegboyega Oyetola announced the coming distribution of almost 70K additional health insurance scheme cards and also received recognition as an “Ambassador for Better Health.”  
  - The Delta State Contributory Health Commission partnered with Nigeria Health Watch for an **in-depth video and blog update** on the current status of the **health insurance scheme** launched in 2017 – having enrolled over 1M people since its establishment. |
| **Pakistan** | **Prime Minister Imran Khan**, Punjab Health Minister **Dr. Yasmin Rashid** and other federal and provincial health leaders **launched the ‘Naya Pakistan Sehat scheme’ providing annual health insurance coverage of Rs1M to each family in Punjab province** (a financial commitment of  Rs440 billion over three years by the Punjab government).  
  - The Prime Minister’s office, Ministry of National Health Services and World Health Organization held an **event speaking to the theme of this year’s UHC Day**, featuring top officials including Dr. Faisal Sultan (Special Assistant to the Prime Minister), Dr. Zafar Mirza (UHC Advisor, WHO) and Dr. Rana Safdar (Director-General, Health, Pakistan). |
| **Uganda** | Members of Parliament, civil society, religious leaders and media gathered for a **UHC Day meeting in alignment with this year’s theme**. Critically, MPs, representatives of the Ministry of Health and religious leaders **committed to re-introducing a National Health Insurance bill** in the next session of Parliament. |
| United Arab Emirates | The Ministry of Health and Prevention was an instrumental **host and partner coordinating the in-person and global Walk the Talk: Health For All challenge**, as well as the full day’s festivities and Specialist Event at Expo 2020 on UHC Day (see “Events and Actions” section for more details). |
| United Kingdom | In a **video** part of the UHC Day champions campaign, Wendy Morton MP, Minister for Europe and the Americas announced **two FCDO policy papers**, which were then **published** on 14 December:  
  o “**Ending preventable deaths of mothers, babies and children by 2030**,” lays out the UK’s approach to addressing the reality that every 6 seconds, a pregnant woman, newborn baby or child dies somewhere in the world.  
  o “**Health systems strengthening for global health security and universal health coverage**,” details how the agency will work with international partners to build strong, resilient and inclusive health systems. |
| United States | USAID **amplified** the report “**Universal Health Coverage through High-Performing Health Care**,” released earlier this year and affirming their commitment to delivering “accountable, affordable, accessible and reliable” health care. |

**UHC Champion Campaign**

This year’s UHC Champion series comprised **75 high-level government officials, civil society leaders and frontline workers**, including Director-General of the WHO, Dr. Tedros. Of these, **37 participated in our inaugural champion video campaign** and **38 submitted quotegraphics**, all sharing with the world **personal messages about what #HealthForAll means to them**, their countries and their communities. The Group of Friends of UHC was a driving force behind securing participation by key government officials. In total, **24 national and local government leaders** participated in the campaign.

Versions of the champion video series were featured at Dubai Expo 2020 and New York Group of Friends event, and champions shared their individual videos and quotegraphics across social media. All quotegraphics were made available to the public through the UHC Day toolkit, and all individual videos were also shared through the UHC Day twitter handle.
Health and Development Champions:

- **Abdourahmane Diallo** (CEO, RBM Partnership to End Malaria)
- **Agnes Binagwaho** (Vice Chancellor, University of Global Health Equity)
- **Dr. Akihito Watabe** (Task Lead, UHC2030)
- **Amy Boldosser-Boesch** (Senior Director, Management Sciences for Health)
- **Anamaria Bejar** (Global Director of Advocacy, International Planned Parenthood Federation)
- **Cary James** (Chief Executive Officer, World Hepatitis Alliance)
- **Eliana Monteforte** (Director of Special Projects, Global Health Council)
- **Emilia Saiz** (Secretary-General, UCLG)
- **Gabriela Cuevas Barron** (Co-Chair, UHC2030)
- **Gina Agiostratidou** (Program Director, The Leona M. and Harry B. Helmsley Charitable Trust)
- **Rt. Hon. Helen Clark** (Board Chair, PMNCH)
- **Helga Fogstad** (Executive Director, PMNCH)
- **Ibtihal Fadhil** (President, Eastern Mediterranean NCD Alliance)
- **Ilona Kickbusch** (Chair, International Advisory Board, Global Health Centre, Graduate Institute for International and Development Studies, Geneva)
- **Jagan Chapagain** (Secretary General, IFRC)
- **Javier Hourcade Bellocq** (Member, UHC230 Steering Committee / CSEM)
- **Dr. Jeff Markuns** (Executive Director, PHCPI)
- **Juan Pablo Uribe** (Global Director for Health, Nutrition & Population, World Bank & Director of the Global Financing Facility)
- **Julia Tainijoki-Seyer** (Senior Medical Advisor, World Medical Association)
- **Dr. Justin Koonin** (Co-Chair, UHC2030 Steering Committee)
- **Dr. K. Srinath Reddy** (President, Public Health Foundation of India)
- **Keizo Takemi** (Member of the House of Councillors, Japan)
- **Khuat Thi Hai Qanh** (Executive Director, SCDI, Vietnam)
- **Lloyd Jose Nunag** (Advisory Group Member, CSEM UHC2030)
- **Lucica Ditiu** (Executive Director, Stop TB Partnership)
- **Maaya Wakasuji** (Calligraphy Artist)
- **Madhukar Pai** (Professor, McGill University)
- **María Fernanda Espinosa** (President of the 73rd Session of the UN General Assembly, UHC Movement Political Advisory Panel, UHC2030)
- **Martin Chungong** (Secretary General, Inter-Parliamentary Union)
- **Naveen Rao** (Senior Vice President for Health, The Rockefeller Foundation)
• **Nisia Trindade Lima** (President, Oswaldo Cruz Foundation, Fiocruz)
• **Nupur Lalvani** (Founder & Director, Blue Circle Diabetes Foundation)
• **Peter Maurer** (President, International Committee of the Red Cross)
• **Peter Sands** (Executive Director, The Global Fund to Fight AIDS, Tuberculosis and Malaria)
• **Dr. Roopa Dhatt** (Executive Director, Women in Global Health)
• **Rosemary Mburu** (Executive Director, WACI Health)
• **Sarah Kline** (Founder & CEO, United for Global Mental Health)
• **Dr. Seth Berkley** (CEO, Gavi, the Vaccine Alliance)
• **Smitha Sadasivan** (Member, Multiple Sclerosis Society of India)
• **Svetlana Akselrod** (Director, WHO Global NCD Platform)
• **Tlaleng Mofokeng** (Special Rapporteur on the Right to Health, UN Human Rights Council)
• **Dr. Tedros Adhanom Ghebreyesus** (Director-General, WHO)
• **Vytenis Andriukaitis** (WHO Special Envoy for the European region)
• **Winnie Byanyima** (Executive Director, UNAIDS)
• **Yacine Diop Diibo** (Founder & Executive Director, Speak Up Africa)

Governments and Permanent Missions to the UN:

• **Alexander De Croo** (Prime Minister, Belgium)
• **Marcelo Queiroga** (Minister of Health, Brazil)
• **H.E. Mr. Magnus Heunicke** (Minister of Health, Denmark)
• **H. E. Stéphanie Seydoux** (French Ambassador for Global Health)
• **Delphine O** (Ambassador for Gender Equality, French Ministry of Foreign Affairs)
• **Ekaterine Tikaradze** (Minister of Internally Displaced Persons from the Occupied Territories, Labour, Health and Social Affairs, Georgia)
• **Ambassador T.S. Tirumurti** (Permanent Representative/Ambassador of India to the UN)
• **H.E. Arrmanatha C. Nasir** (Permanent Representative, Permanent Mission of the Republic of Indonesia to the UN)
• **Goto Shigeyuki** (Minister of Health, Labour and Welfare, Japan)
• **Alexey Tsoy** ( Minister of Health, Republic of Kazakhstan)
• **Xavier Bettel** (Prime Minister, Luxembourg)
• **Amb. Juan Ramón de la Fuente** (Permanent Representative, Permanent Mission of Mexico to the UN)
• **Monica Geingos** (First Lady of the Republic of Namibia)
• **H.E. Mr. Surangel S. Whipps Jr.** (President, Republic of Palau)
• **Ambassador Enrique A. Manalo** (Permanent Representative, Permanent Mission of the Philippines to the UN)
• **H.E. Mr. Anutin Charnvirakul** (Deputy Prime Minister and Minister of Public Health, The Kingdom of Thailand)
• **H.E. Ms. Wendy Morton** (UK Minister for Europe and Americas at the Foreign, Commonwealth & Development Office)
• **Sergiy Kyslytsya** (Permanent Representative of Ukraine to the UN)
• **Elizabeth Cousens** (President & CEO at the United Nations Foundation)

With the help of United Cities and Local Governments (UCLG), several prominent city mayors from around the world also joined the campaign, including:

• **Berry Vrbanovic** (Kitchener, Canada)
• **Li Mingyuan** (Xi’an, China / Co-President, UCLG)
• **Rohey Malick Lowe** (Banjul, Gambia)
• **Ada Colau** (Barcelona, Spain)
• **Carola Gunnarsson** (Sala, Sweden)

**United Nations and Multilaterals**

In addition to engagement in the 2021 champions campaign and media engagement covered elsewhere in this report, several UN and multilateral leaders issued statements and participated in UHC Day activities.

• **UN Secretary-General António Guterres** issued a [statement](#) calling for renewed urgency in building equitable, resilient health systems in light of the COVID-19 pandemic.
• **WHO Director-General Dr. Tedros** marked [UHC Day at Dubai Expo 2020](#), kicking off the Walk the Talk: Health for All challenge and providing remarks at the afternoon Specialist Event.
• **WHO** released a [video](#) about the new global monitoring reports on UHC and health financing published in partnership with the World Bank.

Several multilateral actors engaged with UHC Day on social media, including (but not limited to) statements from:
vi. News, Announcements & Reports

News & Media Highlights

- Despite a media landscape saturated with media coverage on the new Omicron COVID variant, UHC Day garnered at least 151 pieces of media coverage (including earned media, broadcast segments, op-eds, editorials, press releases, statements, and journal articles).
- This year, in-country and regional media was especially prominent with articles highlighting new UHC initiatives, events, and progress made on achieving universal health coverage. Notable highlights included coverage of:
  - **Indian** Union Minister of State for Health and Family Welfare Dr. Bharati Pravin Pawar’s remarks at the UHC Day ceremony and technical workshop on the UHC Day theme “Leave no one’s health behind: Invest in health systems for all.” ([Dariya News](https://www.dariyanews.com), [Express Healthcare](https://expresshealthcare.com))
- WHO Representative to Nigeria Dr. Walter Kazadi Mulombo’s call for countries to invest more in health care and systems in order not to leave no one behind at a ministerial press conference. *(Blueprint)*
- A celebration of UHC Day by the WHO, the UAE and Expo 2020 Dubai, and the announcement of a new partnership between the UAE and the WHO to help the government agency reach key targets more quickly. *(Gulf News, The National, Emirates News Agency, Khaleej Times, Oman Daily, Emirates News Agency)*
- An infographic tied to UHC Day which announced that more than five million Egyptian citizens have been registered for the country’s Universal Health Insurance System. *(Ahram Online)*
- Pakistan Prime Minister Imran Khan’s launch of a new program to give health insurance to all residents of Punjab, which offers free medical treatment of up to Rs 1 million annually. *(Dawn, Gulf News)*
- Lookback pieces evaluating the progress made on achieving universal health coverage both on a global scale and in India and Africa. *(African Health Observatory, United Health Futures, The Logical Indian)*

- Several organizations issued press releases and statements of support for UHC tied to the day. There were at least 19 press releases issued from stakeholders such as WHO/World Bank, WHO EMRO, WHO Africa, and UNAIDS. Two releases of note were:
  - UNAIDS’s press statement by Winnie Byanyima, the Executive Director of UNAIDS, on addressing inequalities and the steps we need to take in order to achieve universal health coverage.
  - The WHO & World Bank’s press release on their two reports released on UHC Day highlighting the devastating impact of COVID-19 on people’s ability to obtain healthcare and pay for it, which garnered considerable earned local and international media coverage. *(MENAFN, The Star, Global Citizen, Reuters, Vanguard, World Economic Forum, Global Health NOW, Khaleej Times, Economic Times, Modern Diplomacy)*

- The Lancet published a number of editorials and commentary pieces advocating for universal health coverage and examining the existing model of universal health coverage.
  - An editorial calling for support to make universal health coverage and strengthening health systems included in future international agreements a priority. *(The Lancet)*
  - An article proposing universal health coverage and social protection as priority, programmatic, and policy recommendations to safeguard people living in
vulnerable conditions during the pandemic, prevent the spread of COVID-19, and decrease health inequalities. (The Lancet)

- A commentary on the current approach to universal health coverage, which is partly built on a flawed and unjust human resource model, as all health systems normalize and perpetuate underpaid and unpaid health work, which exploits women. (The Lancet)

New Reports

- **The World Health Organization** marked UHC Day with the release of several major reports and documents:
  - WHO and The World Bank published the 2021 Global Monitoring Report: Tracking Universal Health Coverage, which assessed health systems, spending and coverage around the world, and tracked progress made towards UHC.
  - WHO and The World Bank published the Global monitoring report on financial protection in health 2021, which analyzed and tracked the status of financial protection across the world as part of the overall measurement of UHC before and amidst the COVID-19 pandemic.
  - WHO published the report, “South-East Asia regional strategy for primary health care: 2022-2030,” which aims to accelerate progress towards achieving UHC in the South East Asia region by providing Member States with guidance on facilitating PHC-orientation.

- **UHC2030** released the State of UHC Commitment Synthesis ahead of UHC Day 2021, detailing the state of country commitments to UHC around the globe, alongside an updated country profile dashboard and data portal.
  - The Civil Society Engagement Mechanism for UHC2030 published “From Commitments to Action: Civil Society Perspectives on Reaching Universal Health Coverage,” a summary of results from 19 focus group conversations on issues that governments and other decision-makers should address to ensure UHC policies are inclusive and equitable.

- **The UK Foreign, Commonwealth & Development Office (FCDO)** published two policy papers, “Health systems strengthening for global health security and universal health coverage: FCDO position paper” and “Ending preventable deaths of mothers, babies and children by 2030: approach paper” which pledge to support stronger health systems that achieve universal health coverage to end preventable deaths and enhance global health security.
• The International Labour Organization published a report titled “Extending social health protection: Accelerating progress towards Universal Health Coverage in Asia and the Pacific” detailing the progress made and remaining coverage gaps, challenges encountered and explores their root causes.

• Primary Health Care Performance Initiative and 23 countries jointly published "If Health Systems Could Talk: Illuminating the Vital Signs of Strong Primary Health Care," an actionable snapshot of the strengths and weaknesses of primary health care in the health system.

VII. APPENDIX: Media Coverage List

Opinion and Commentary (15)

• India, Hindustan Times: Citizen’s engagement is the backbone of Universal Health Coverage (Poonam Muttreja, Executive Director, Population Foundation of India – 12 Dec)
